## **Jupiter Family Healthcare Preventative Services Education**

The promotion of healthy lifestyles and the early identification of potential health risks will benefit you and are important to us. In accordance with the current United States Preventative Task Force (USPSTF) guidelines, we have put together the following information for your guidance. Please read this preventative education sheet and feel free to discuss any of the topics with our staff. Only you can take appropriate actions to maintain your health and well being.

### 1) Lifestyle Changes:

#### Diet and Exercise:

A healthy diet and regular exercise are the most effective ways to maintain good health, longevity and increase your quality of life. Choose a diet low in saturated fat, cholesterol, sugar and salt; eat plenty of vegetables, fruits, grains which provide vitamins, minerals, and fibers, lean meats, pastas, etc. Thirty minutes of exercise, three to five times a week (walking, swimming, etc.) will keep your heart and bones healthy.

#### Substance Abuse

Use of tobacco is known to cause heart disease, strokes and lung cancer. Excessive alcohol intake is associated with many illnesses including cancer, liver disease and impaired judgment (as in driving). Illicit drug use has many risks such as AIDS, hepatitis, heart problems, and mental and social disorders.

#### Sexual Behavior

Certain sexual practices (i.e., promiscuity, unprotected sex) can expose you to potentially fatal disease such as AIDS, Sexually transmitted diseases and common other infections.

#### Excessive Sun Exposure

Causes skin cancer. Always wear sunscreen when exposed in the sun. The higher the SPF (sun protection factor) you use, the higher the protection level against the ultraviolet rays.

#### Injury Prevention

Take advantage of the many safety products that are important in preventing serious injury. These include seat belts, bicycle helmets and other protective gear, safe work habits (lifting, bending, etc.), smoke detectors, firearm safety, water safety practices for adults and children, CPR training for household members, poison prevention, etc.

#### Dental Health

Brush and floss regularly; see your dentist for routine visits every six months.
